

Raahi App — Complete Navigation Map

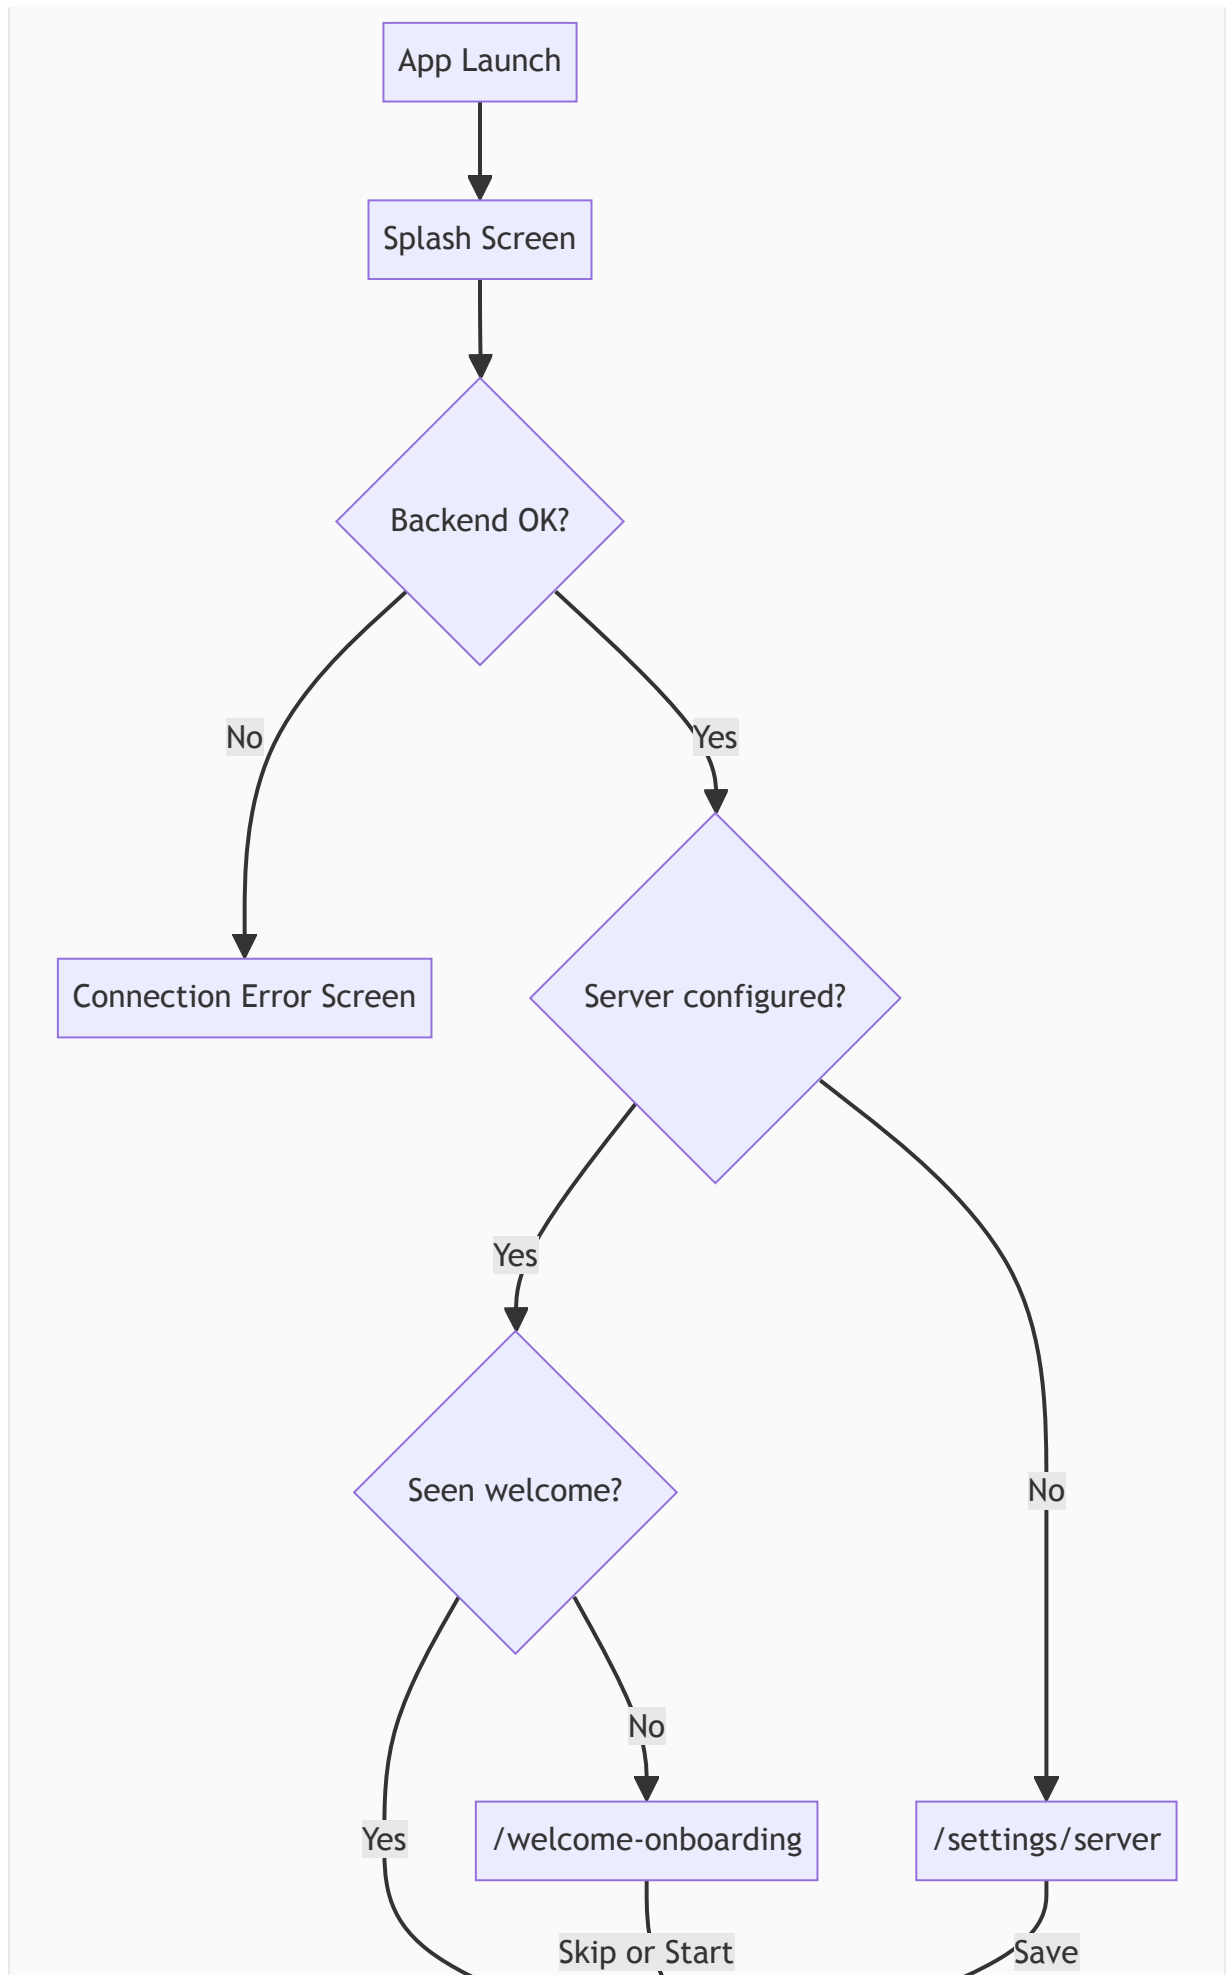

Package: `com.rhi.raahi`

Project: LatestFrontend (Flutter + GoRouter)

Generated: June 2026

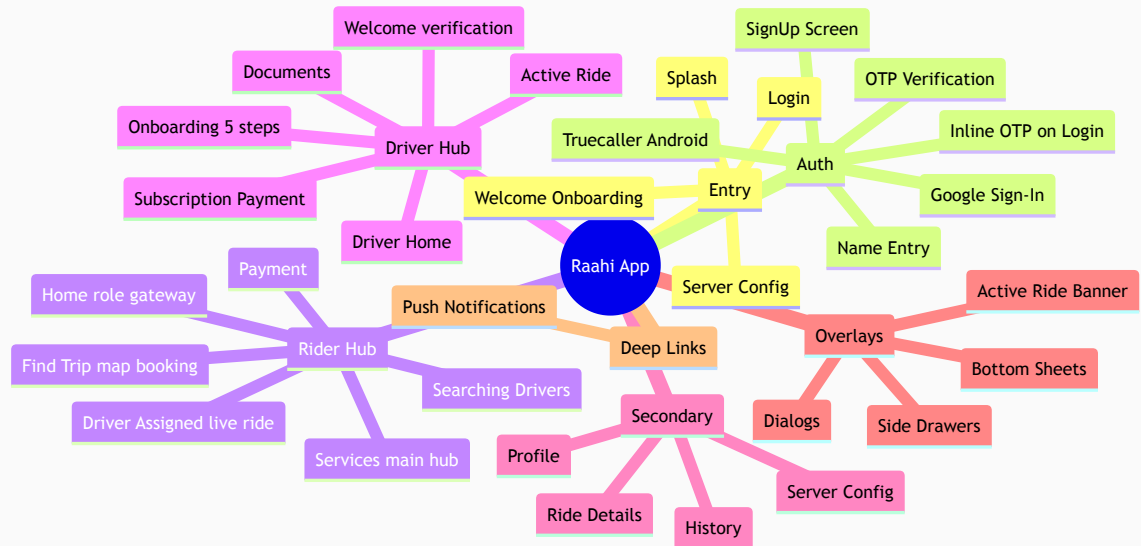

Purpose: Full tree of screens, routes, and tap/click actions from app start.

1. App Launch (Start → First Screen)

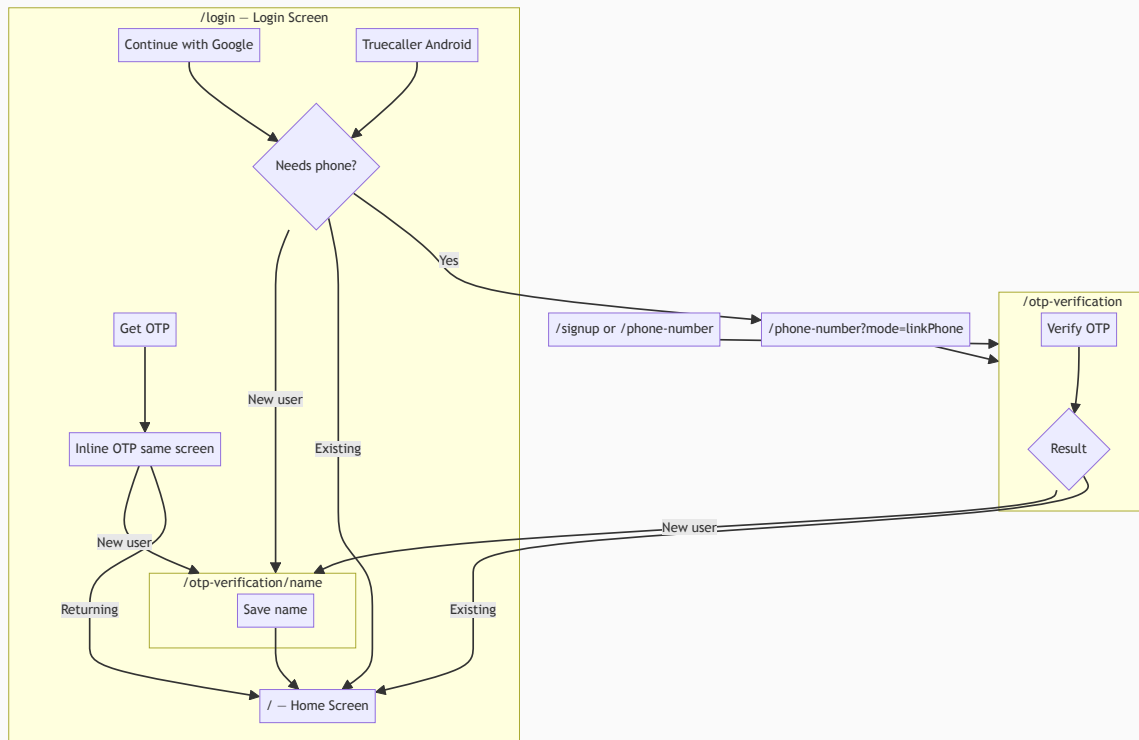

/login

2. Master Mindmap

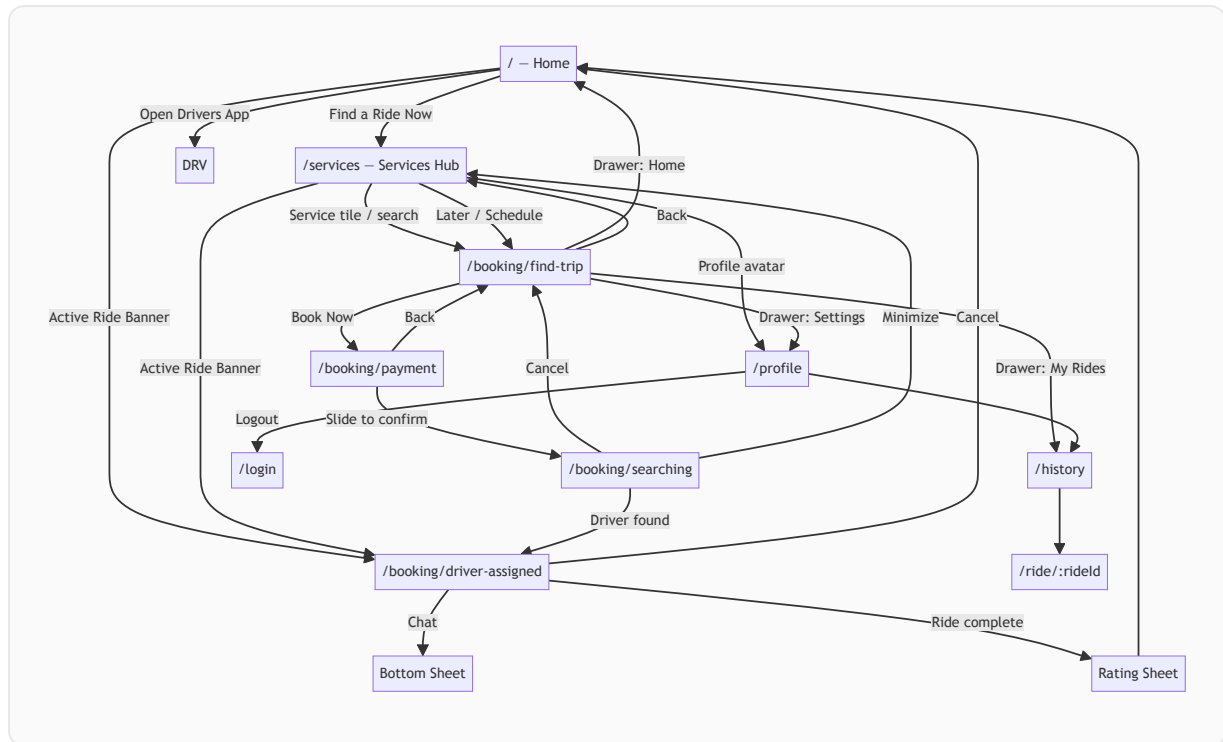

3. Auth Flow

Auth modals (no route change)

- Resend OTP → bottom sheet
- Switch account → bottom sheet → logout → `/login`
- Truecaller OTP → dialog
- Terms / Privacy → external browser

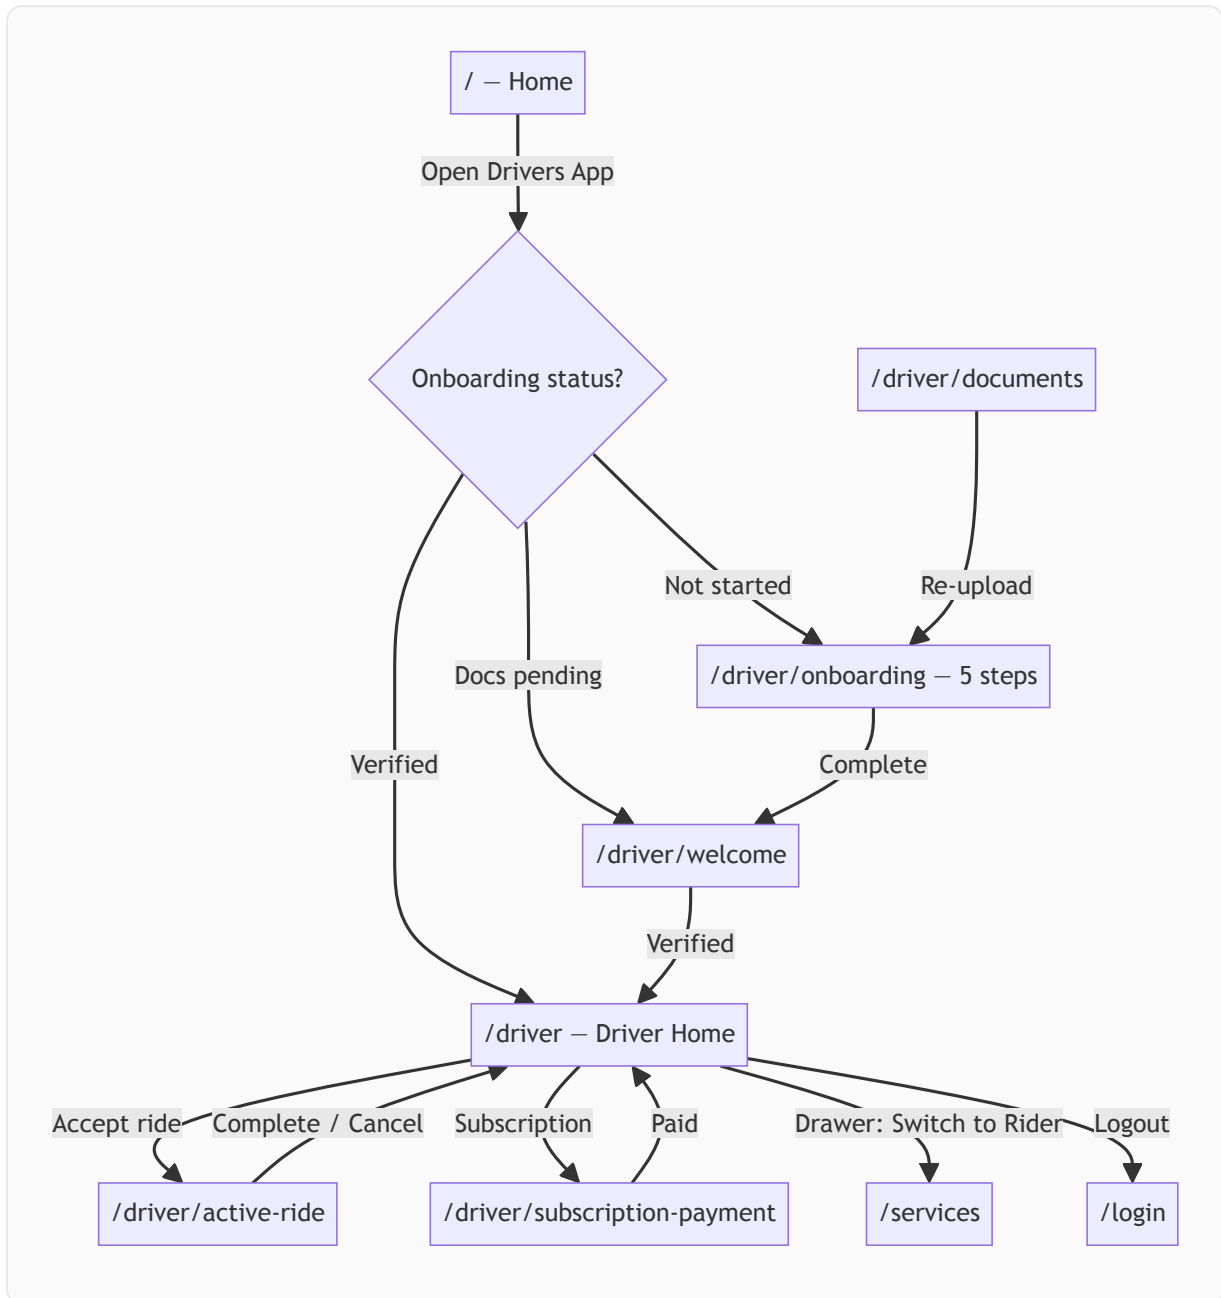

4. Rider Flow (Passenger — Complete Path)

End-to-end rider booking

```
/ → /services → /booking/find-trip → /booking/payment  
→ /booking/searching → /booking/driver-assigned → [rating sheet] → /
```

5. Driver Flow (Complete Path)

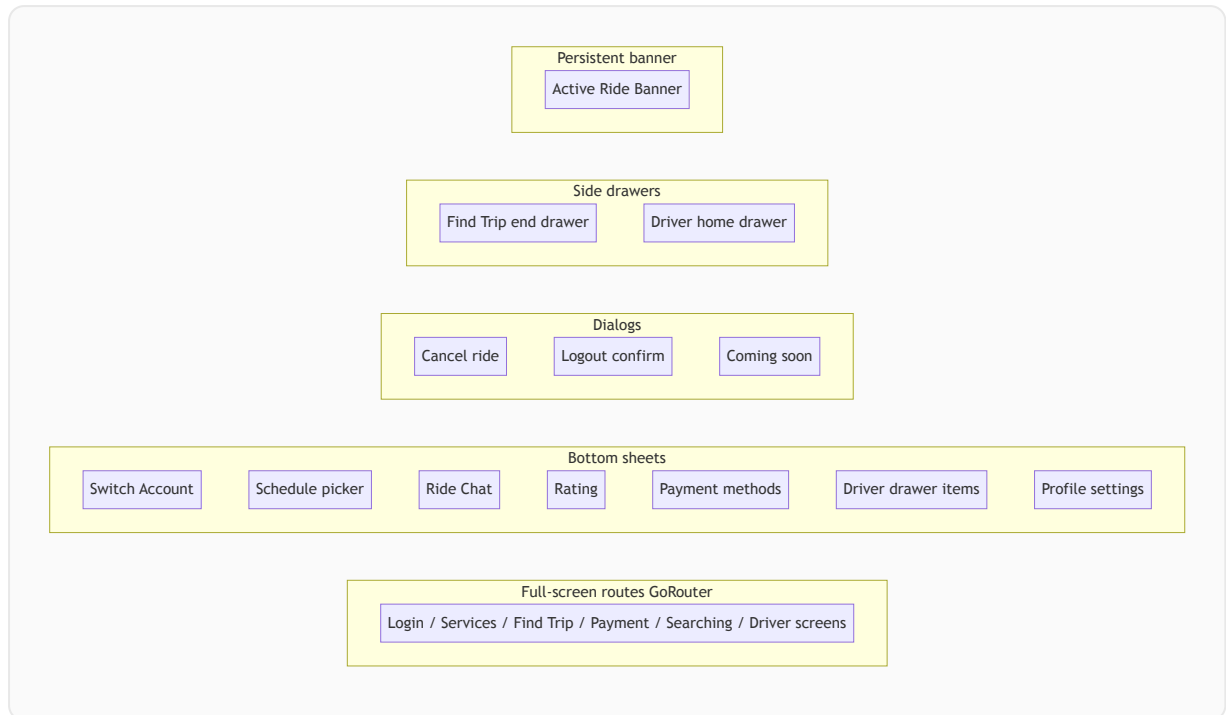

Driver onboarding steps

1. Language
2. Vehicle
3. Personal info
4. Documents
5. Verification status

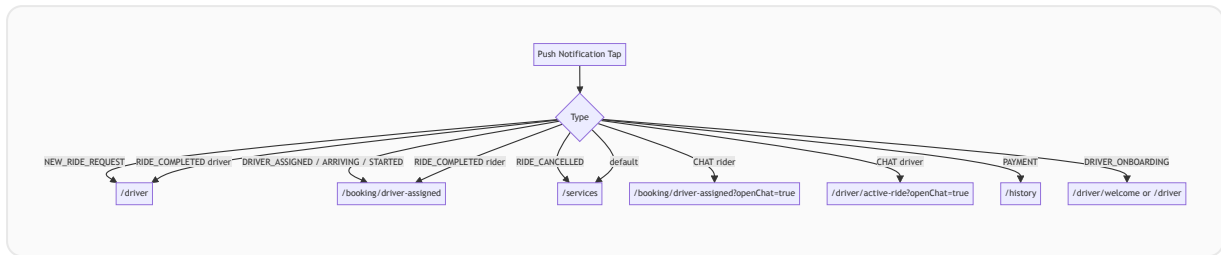

6. All Registered Routes

Route	Screen	Opens From
/settings/server	Server Config	First launch; Profile settings
/welcome-onboarding	Welcome carousel	First launch
/login	Login	After welcome; logout
/signup	Sign Up	OTP back-nav
/phone-number	Phone link	Google/Truecaller needs phone
/otp-verification	OTP verify	SignUp flow
/otp-verification/name	Name entry	New user after OTP
/	Home (role gateway)	Post-auth; post-rating
/services	Services hub	Home "Find a Ride"
/history	Ride history	Profile; Find Trip drawer
/profile	Profile	Services avatar; drawer
/ride/:rideId	Ride details	History row tap
/booking/find-trip	Find Trip map	Services tiles / schedule
/booking/payment	Payment	Find Trip "Book Now"
/booking/searching	Searching drivers	Payment confirm
/booking/driver-assigned	Rider live ride	Driver matched; banner
/driver/onboarding	Driver onboarding	Home "Drivers App"
/driver/welcome	Driver welcome	Onboarding done
/driver/documents	Document mgmt	Update mode redirect
/driver	Driver home	Verified driver
/driver/active-ride	Driver live ride	Accept ride
/driver/subscription-payment	Subscription pay	Driver home gate

7. Overlays vs Full Screens

8. Push Notifications → Screen

9. Screen-by-Screen Click Actions

Home (/)

- **Find a Ride Now!** → /services
- **Open Drivers' App** → onboarding / welcome / /driver (by status)
- **Active Ride Banner** → /booking/searching or /booking/driver-assigned
- **Switch account** → bottom sheet

Services (/services)

- **Profile avatar** → /profile
- **Later / Schedule** → schedule sheet or /booking/find-trip
- **Service tiles / search / places** → /booking/find-trip?autoSearch=true
- **Active ride exists** → /booking/driver-assigned or /booking/searching

Find Trip (/booking/find-trip)

- **Book Now** → /booking/payment
- **End drawer** → Home, History, Payment methods sheet, Help sheet, Profile

Payment (/booking/payment)

- **Slide to confirm** → /booking/searching

Searching (/booking/searching)

- **Driver matched** → /booking/driver-assigned
- **Cancel** → /booking/find-trip
- **Minimize** → /services

Driver Assigned (/booking/driver-assigned)

- **Chat** → bottom sheet (not a route)

- **Ride complete** → rating sheet → `/`
- **Cancel** → `/`

Profile (`/profile`)

- **Total Rides** → `/history`
- **Switch to driver** → `/` (driver gateway)
- **Notifications / Help / Saved places** → bottom sheets
- **Server config** → `/settings/server`
- **Logout / Delete account** → `/login`

Driver Home (`/driver`)

- **Accept ride** → `/driver/active-ride`
- **Drawer: Switch to Rider** → `/services`
- **Drawer: History / Earnings / Settings / Help** → bottom sheets
- **Drawer: Update Documents** → `/driver/onboarding?isUpdateMode=true`

10. Architecture Notes

1. `/` **is not the booking home** — it is the role gateway. Rider booking hub is `/services`.
2. **Live rider ride** = `/booking/driver-assigned` (not `/ride/:id/tracking`, which is legacy).
3. **Login OTP is inline** on `/login` — no route change until verify succeeds.
4. **Chat** opens as a bottom sheet on active-ride screens, not `/ride/:id/chat`.
5. **Active Ride Banner** appears on Home, Services, Profile, History.
6. **Driver vs Rider split**: Rider hub = `/services`; Driver hub = `/driver`.
